

Help shape community benefits for Uriarra

Private Energy Partners is proposing a Community Partnership Program for Flat Rock Energy Storage, to share the benefits of the project among the Uriarra and surrounding communities.

If the project proceeds, regular funding will be available to support local projects, activities or initiatives that respond to community priorities and provide lasting local benefits.

This support would begin when construction starts and continue through the life of the project, including operation and decommissioning.

What would the Community Partnership Program support?

The areas we'd focus on

We're looking at five areas where we believe community partnerships could make a difference:

- **Community enhancement** – Ideas and projects that help bring people together and improve local life
- **Health and wellbeing** – Initiatives that support a healthier, happier and more connected community
- **Environment** – Projects that help care for and protect the local environment
- **Reconciliation** – Working with local Traditional Owners on initiatives that are respectful, practical and meaningful
- **Education and skills** – Opportunities that help people build knowledge, confidence and pathways into training or work.

What we'd look for

We'd like to support projects and initiatives that:

- make a clear **positive** difference for the community or environment
- are **open**, inclusive and accessible
- respond to a **real** local need
- create lasting **value** where possible
- can be delivered **safely** and well.

What kind of projects could be supported

We want the framework to be flexible so it can support different kinds of local partnerships, including (but not limited to):

- **Community facilities and infrastructure** – Support for upgrades, improvements or new spaces that benefit the wider community
- **Events and local initiatives** – Help for community events, programs and activities that bring people together
- **Training and development** – Opportunities such as scholarships, traineeships, apprenticeships and other ways to build local skills.

How your input could help

Our first step is to create a Community Partnership Program Framework. This document will set out the structure and governance of the Community Partnership Program, including establishing who the program is intended to help, how local people have a say, how funding decisions are made and how the program will be managed.

There is no single right way to develop this framework, which is why we want to hear from you. Your input will help ensure the final framework is locally relevant, builds trust and sets up a program that can deliver meaningful benefits to Uriarra and surrounding communities.

**Scan the QR code
to visit the project website.**

You can provide your feedback in any of the following ways:

Through our survey

- online at **www.flatrockenergystorage.com.au** or by scanning the QR code on this page; or
- by hard copy, then scanning and emailing it to **community@private-energypartners.com**, or posting it to PO Box 842 GPO Brisbane QLD 4000.

In person

- Attend our drop-in community information session and chat to our project team - details are below.

By phone

- Call 1800 975 039 and we can record your feedback over the phone.

The survey will close on Saturday 31 October 2026.

After the survey closes, we'll review the feedback received and use it to help shape the final Community Partnership Program Framework for the project. The community will also have an opportunity to comment on the draft framework before it is finalised.

Community Partnership Program timeline

Drop-In Community Information Session

Saturday 17 October 2026

9:00am–12:00pm (drop-in at any time)

Coffee will be available

Uriarra Village Community Centre

Jim Bradley Crescent, Uriarra Village
