

This is an update on planning for the Northern Quartz Campus in the Townsville region.

The Northern Quartz Campus projects include:

- Supernode North Battery Energy Storage System (BESS) in the Lansdown Eco-Industrial Precinct (LEIP)
- Metallurgical Silicon Production Facility (smelter) in the LEIP
- Lansdown Solar North in Woodstock
- Lansdown Solar West in Woodstock.

The Northern Quartz Campus is sponsored by Quinbrook and is being developed by Quinbrook's project development and delivery arm, Private Energy Partners.

Drop-In Community Information Session date change

Please note the date for our next Drop-In Community Information Session has changed.

We will be holding our next session on **Tuesday 17 November, 5-7pm**, at the Woodstock Sport and Recreation Club.

The focus of this session will be the Metallurgical Silicon Production Facility (smelter), with updates about other Northern Quartz Campus projects to also be provided.

Development Application update

We submitted the Development Application (DA) for the Supernode North BESS to the Queensland Government's State Assessment and Referral Agency (SARA) in April – it is currently going through the assessment process.

We expect to lodge the DAs for Lansdown Solar North and Lansdown Solar West by the end of this year.

We are also currently developing the remaining DAs to support the Northern Quartz Campus – more information about this will be available at the November Drop-In Community Information Session.

Supporting the Woodstock community

Being a good neighbour in the Woodstock community is important to us.

We are proud to have supported both the Woodstock State School P&C with a \$15,000 donation and Reid River Rural Fire Service with a \$3,000 donation to support priority projects.
